Faith,

This reply is really cryptic and there is no reference to the start of activity prior to a completed PA. Are you sure this is the document that you are relying on to move forward on 13 test piers?

Ray

Subject: SHPD acceptance Transit Archaeological Inventory Survey Phase I

Aloha Transit Team:

Good news!

We have (attached) an SHPD acceptance letter for our Archaeological Inventory Survey for the first 7.4 miles of the transit corridor (and most of the appurtenance areas).

As per a prior SHPD review a recommendation for monitoring was changed to data recovery.

As per page 431 of the now-accepted AIS study there is no requirement for an archaeological monitoring program.

My own recollection is that the Transit Team made certain assertions in public (possibly also in writing) that there would be an archaeological monitoring program for each phase of the transit project.

I believe we are all clear on the likely response of the O'ahu Island Burial Council to any news that there is no monitoring requirement at all for Phase I of the transit work or for the rather substantial associated utility relocation (pot-holing work for which I understand is to begin quite soon).

An option for possible Team consideration would be a voluntary program of once a week (or more frequent) archaeological spot monitoring inspection.

Cultural Surveys will see to the standard, clerical, final submission (but you now have the SHPD's last word)

Aloha.

David Shideler
